ABSTRACT

25X1D

25X1D

This report presents detailed analysis of the order of battle observed at Petrovka Shipyard on the [] missions which covered the yard []. The principal activities during this period were the refueling and overhauling of E-II class submarines and the conversion of E-I class submarines to a new and unexplained configuration. Chief characteristic of the new configuration is the apparent absence of missile launchers.

BASIC DESCRIPTION

Petrovka Shipyard is on the eastern shore of Zaliv Ussuriyskiy, approximately 20 nautical miles east of Vladivostok. It is the fitting-out yard for submarines of the Soviet Pacific Ocean Fleet.

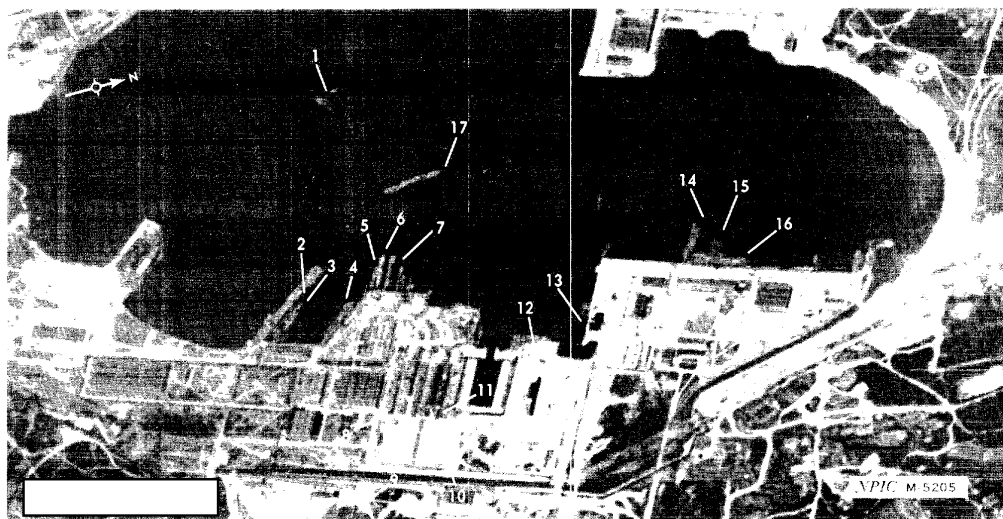

Specific details on the status of work being carried out at the shipyard are provided for each mission []
